

Climate Activism Workshop Info Hub

Introduction

This document is a hub of information for the Watkinson School 2021 Social Justice Day “Climate Activism” workshop, led by [Jona Ruser](#) and [Owen Chambers](#). This workshop is a partnership of two larger Capstone Projects, relating to dietary impacts on the environment and ecosystem conservation, respectively. More on these Capstone Projects can be found below.

1. Speakers Notes/Research

This is a hefty, albeit messy compilation of our notes relating to this workshop. These notes also functioned as makeshift speakers notes during our workshop. If you'd like an idea of how our workshop worked, a skim of these notes and our presentation (below) would suffice. A more detailed analysis is provided on each of our websites (below).

2. Slideshow

This is the visual provided during our workshop. This presentation, accompanied with our speakers notes (above) would provide an accurate representation of our workshop. A more detailed analysis is on each of our websites (below) following the completion of the workshop.

3. “Activists vs. Corporations” Game

This is the handout for the game which was played during the workshop. The purpose of this game is to provide reasoning behind why it can be difficult to incentivise governments to make legislation that positively impacts the global climate. This document comes with instructions to play the game as well as the resources needed to play it.

4. Bibliography

This is the bibliography of all of the facts provided in our workshop, in MLA 8.

5. Jona’s Capstone Project

This is the hub for Jona Ruser’s Capstone Project, on the dietary impact on the environment and the human body. It includes a full-length research paper as well as a third product which is TBA.

6. Owen’s Capstone Project

This is the hub for Owen Chambers’ Capstone Project, on the factors of a successful environmental restoration effort. It includes a full-length research paper as well as a third product which is a case study of a struggling ecosystem.
